

Resources for Private Well Water Testing

The Washington Ozaukee Public Health Department does not sample private well water. If you are looking to test your private well for various contaminants such as bacteria, nitrates, arsenic and other metals the following labs have kits available for purchase. Call or visit their website to order kits and obtain specific prices.

Water Diagnostics, Mequon WI, Call 414-350-1100 or visit
<http://waterdiagnostics.net/index.html>

UW Stevens Point Water and Environmental Analysis Lab Call 877-383-8378 or visit
www.uwsp.edu/cnr-ap/weal

Wisconsin State Laboratory of Hygiene Call 800-442-4618 or visit www.slh.wisc.edu

Environmental Research and Innovation Center at UW-Oshkosh Call 920-424-3148
or visit www.uwosh.edu/eric

Jackson Water Utility, Jackson WI Call 262-677-9001 or visit
<http://www.villageofjackson.com/index.asp>

Metiri Group, Mequon WI Call 920-459-2500 or visit
<https://drinkingwaterlabs.com/collections/wisconsin-water-tests-kits>

Village of Fredonia, Fredonia WI Call 262-483-0275 (Bacteria and Nitrate Only)
<https://www.fredoniawi.gov/public-works-parks-and-water-sewer-utilities>

Additional laboratories can be found at: <http://dnr.wi.gov/regulations/labcert/lablists.html>

**Well owners frequently get false positives because they do not properly collect the sample or they do not get it to the laboratory within the amount of hours required for an accurate test. The laboratory you work through will provide you with a water sampling kit and specific directions. It's very important to make sure you follow their sampling directions.

Please call the Washington Ozaukee Public Health Department at 262-335-4462 if you have questions about testing your private well water or your sample results.
